Animal Diets

LO: To be able give a definition to Herbivore, carnivore and omnivore and identify animals that fit into these categories.

Information sheet3

Omnivores

Carnivores eat only animals.

Herbivores eat only plants.

But some animals eat animals **and** plants.

These animals are called **omnivores**.

Omnivores survive by eating both plants and animals.

This can be a good way of staying alive. If they cannot find meat, omnivores can eat plants instead.

Omnivores come in all shapes and sizes!

Grizzly bears eat seeds, berries and grass.

They also eat deer, fish and insects.
