

How can we see a magnetic field?

Science

Miss Roberts

TASK

1. The 'field' of a force is an area in which an i_____ force will a_____.
2. A picture of field lines is like a m_____ of an invisible force, to show where a f_____ will act in different p_____ around an object.
3. What are the two ways that you could see a magnetic field?

Let's sketch our own field lines
